

Virtual Hiring Event Statistics 2026

Show rates, speed, cost, and what actually converts — every stat sourced.

91%	average interview show rate at JobFairX healthcare events (self-scheduled interviews)
~45%	typical virtual hiring event show rate (Indeed)
4 days	median from event signup to interview (Indeed Hiring Events)
35 / 8	average scheduled interviews / hires per employer, per JobFairX event
3%	of job board applicants ever reach an interview (CareerPlug, 10M+ applications)
\$60,090	the cost of a single RN turnover (NSI 2026)
\$1.8B to \$5.2B	virtual career fair platform market, 2025-2034 (Data Intelo)
100+	upcoming events on the public JobFairX calendar at any given time

1. Show rates: who picked the slot?

Typical virtual hiring events see interview show rates around 45% (Indeed). When candidates pick the employer and self-schedule the time slot, JobFairX healthcare events average **91%**. Same candidates, same roles, different structure: requested interviews get honored; assigned ones get ghosted.

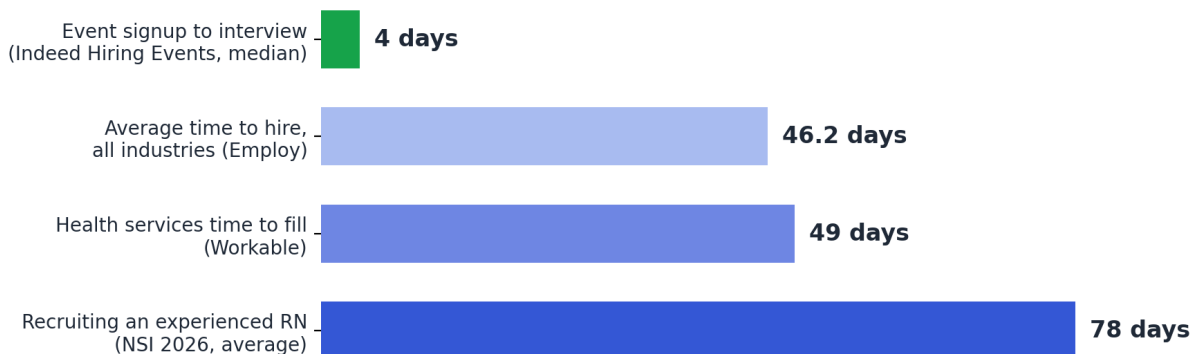

Sources: Indeed published event data (typical); JobFairX healthcare event averages, 2026 (self-scheduled).

2. Speed: 4 days vs. 78 days

The median virtual event candidate is in an interview 4 days after signup (Indeed Hiring Events). The average time to hire across industries is 46.2 days (Employ); health services time to fill runs 49 days (Workable); recruiting an experienced RN takes 78 days on average (NSI 2026). Entry-level candidates decide in days, so the channel that reaches them in 4 wins.

Days until a candidate is in an interview or hired, 2026

3. Volume: what one event produces

Job boards convert roughly 180 applications into 5 interviews and 1 hire (CareerPlug, 10M+ applications analyzed). A JobFairX event averages 35 scheduled interviews and 8 hires per employer. Individual city events regularly draw 600-800 pre-registered, credential-screened candidates (checked live, July 2026: Long Island 599, Oceanside 773, Austin 784), across 100+ upcoming events on the public calendar.

Different funnels measured at different stages: boards start at applications; interview-first events start at scheduled interviews.

4. Cost: the vacancy outcosts the recruiting

Average U.S. cost per hire is \$5,475 (SHRM 2025); healthcare runs \$9,000-\$12,000 (Pin 2026). A single RN turnover costs \$60,090, and the average hospital loses \$5.19 million a year to nurse turnover (NSI 2026). When the empty seat costs 6x the recruiting spend, slow-and-cheap is the most expensive strategy there is.

What hiring costs vs. what the empty seat costs, 2026

5. The market: growth and a shakeout at once

The virtual career fair platform market is projected to grow from \$1.8B (2025) to \$5.2B by 2034, a 12.5% CAGR (Data Intelo). Meanwhile NACE's 2024-25 benchmarks show median attendance at booth-style virtual campus fairs collapsed from 295 to 93 while in-person rebounded from 419 to 700. Both are true: the lobby-and-booth format is shrinking while interview-structured events grow.

Booth-style virtual fairs are shrinking; the format isn't the story

Methodology and sources

JobFairX data: show rate (91%), scheduled interviews (35), and hires (8) per employer are averages across JobFairX healthcare events, published on public event pages and updated as events complete. Registration counts (599-784 per city event) and the 100+ upcoming events were checked live on the public calendar in July 2026 and can be verified by anyone the same way.
